

PARKVIEW

MyChart

On January 12, 2015 Parkview Health will be making updates to proxy access for children as well as giving patients between the ages of 14 and 17 access to their own MyChart accounts.

0-13 years of age:

Parent(s) can request proxy access to their child(ren), and will now be able to view past and future appointments, lab results and other medical information pertinent to children in this age group.

14-17 years of age:

Teenagers in this age group can now request their own MyChart account. This requires parental consent and parents can still request proxy access to their teen's account. Both teens and parents with proxy access will have limited access to certain medical information.

18 years of age and older:

Patients will have their own MyChart account and can request that someone have proxy access to their chart. Any questions regarding proxy access can be directed to the Parkview MyChart call center at 855-853-0001.
