

INVEST IN YOUR HEALTH

Parkview's dedicated Preventive Care Coordinator will guide you through appropriately paced care and tailor a personalized healthcare plan that meets your needs and goals. They will walk alongside you - addressing both clinical and social needs.

At Parkview, we know it can be difficult to manage complex or chronic conditions, such as diabetes, heart disease, high blood pressure, or asthma. Our team of preventive care coordinators are registered nurses who can collaborate with you, your healthcare providers, and other caregivers to help support your personal wellness journey.

Preventive Care Coordinators can provide:

- Patient education on health condition(s) and medication(s)
- Consultation and collaboration with other healthcare providers to set up patient appointments and treatment plans
- Assistance with transition of care
- Health education
- Weight management
- Accountability partnership
- Assessment of patient needs and goals
- Connection to community resources
- Development of a proactive care plan to address personal healthcare needs

Contact our Preventive Care Coordinator team at PreventiveCareCoordinator@parkview.com or 260-266-0264 to get started!
